Dear Mr. Tim Fragar

Re: Pavement coring for road revaluation

At Gunnedah Shire Council we've been continuing to explore best options for allowing improvements in how we do business. We liked the idea presented by Grace Coring, being that for a relatively small single investment in budget terms, we could realize significant benefits in the way we manage our transport assets.

The confidence in the information and enhancement of data we are now able to access has improved our position in terms of overall management of our transport assets.

Put simply, the economic benefits realized in the current asset management plans for transport has demonstrated full cost recovery of our expenditure on Grace Coring's pre-investigation data collection.

Yours faithfully

Daniel Noble
Chief Engineer
